Team 2

(Kitae Kim, Jaeheon Park, Sanghoon Lee)

Overview

Overview

- Secondhand Marketplace for College Students
- Weekly meeting via Discord and KakaoTalk
 - > organize SCRUM sprints through Jira
- Google Spreadsheet for final testing
 - > bug reports, additional requirements

Beta Release

Difficulties

Frontend: Time Management

Had various personal health and family issues during the semester, leading to lack of time management. Resolved via communicating with teammates.

Backend: Chat System

Integrating the pros of Broadcast and Legacy Model in the Chat System Development took the most time.

AI: API Calls and Frontend Integration

Difficulties in choosing AI API

Connecting the JSON output to the Frontend User Interface

Final Release Schedule

FrontEnd

1. UI Refinement
2. Mobile UI Implementation

Backend

1. Authentication & Chatting
2. Bug fixes

AI

1. Test Data Creation
2. Final Testing

Thank You
